

1 NAME

blaze-list - browse the content of the BlazeBlogger repository

2 SYNOPSIS

```
blaze-list [-cpqrsCPSV] [-b directory] [-I id] [-a author] [-t title] [-T tag] [-d  
day] [-m month] [-y year] [-n number]  
blaze-list -h | -v
```

3 DESCRIPTION

blaze-list displays the content of the BlazeBlogger repository. All items are listed by default, but desired subset can be easily selected via additional options.

4 OPTIONS

-b, --blogdir *directory*

Specify the *directory* where the BlazeBlogger repository is placed. The default option is the current working directory.

-I, --id *id*

Display the record with specified *id* only.

-a, --author *author*

List records by specified *author* only.

-t, --title *title*

List records with matching *title*.

-T, --tag *tag*

List records tagged as *tag*.

-d, --day *day*

List records from the specified day where *day* is in the DD format. Do not forget to specify the month and year as well, unless you, for example, want to list all records from the first day of every month.

-m, --month *month*

List records from the specified month where *month* is in the MM format. Do not forget to specify the year as well, unless you, for example, want to list all july records.

- y, -year *year***
List records from the specified year where *year* is in the YYYY format.
- n, -number *number***
List selected *number* of records only.
- p, -pages**
List pages instead of blog posts.
- P, -posts**
List blog posts; this is the default option.
- S, -stats**
Show repository statistics instead of blog posts.
- s, -short**
Display each record on a single line.
- r, -reverse**
Display records in reverse order.
- c, -color, -colour**
Enable coloured output, no matter what is set in the configuration.
- C, -no-color, -no-colour**
Disable coloured output, no matter what is set in the configuration.
- q, -quiet**
Avoid displaying messages that are not necessary.
- V, -verbose**
Display all messages. This is the default option.
- h, -help**
Display usage information and exit.
- v, -version**
Display version information and exit.
